

Docket No.: 195942US0

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

IN RE APPLICATION OF: :

Hiroshi IZUI, et al. :

PATENT NO.: 7,015,010 :

ISSUED: March 21, 2006 :

FOR: METHOD FOR PRODUCING L-GLUTAMIC ACID BY FERMENTATION
ACCOMPANIED BY PRECIPITATION

LETTER TO PTO

ASSISTANT COMMISSIONER FOR PATENTS
ALEXANDRIA, VIRGINIA 22313

SIR:

Patent Owners wish to notify the Office that the bacterial species identified as *Enterobacter agglomerans* in this application/patent has been changed to *Pantoea ananatis*. The change in the previously identified bacterial species *Enterobacter agglomerans* to *Pantoea ananatis* arises as a result of a change in classification since the original characterization of the bacterial strains exemplified in this application/patent.

This name change affects previously identified *Enterobacter agglomerans* AJ13355, *Enterobacter agglomerans* AJ13356, and *Enterobacter agglomerans* AJ13601 and the corresponding descriptions in the specification. These strains are now properly *Pantoea ananatis* AJ13355, *Pantoea ananatis* AJ13356, and *Pantoea ananatis* AJ13601. This name change has also been recorded at the International Patent Organism Depositary, National Institute of Advanced Industrial Science and Technology.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.
